

## 5 Ways Quantis benefits your NHS customer:

Turning raw data into clear insights that help you and your NHS customer.

### IDENTIFY

Identify where service efficiencies and patient outcomes can be improved

### INCREASE

Increase the appropriate diagnosis, management and awareness of a disease

### MAP

Map performance locally and nationally where specialist teams/resources are in place

### PROVIDE

Provide collaborative service solutions that address healthcare inequalities

### GENERATE

Generate real-world evidence to improve patient pathways and outcomes

## 5 years

Five years of healthcare data to help tell your story

### 3 core data sets:

Hospital Episode Statistics (HES)

Quality and Outcomes Framework (QOF)

GP Prescribing data (often referred to as RX, GPRX, PLP)

## 8+

Over 8 additional data sources including the client's own, that can be combined to deliver the most comprehensive data set available in the UK

## 4 Ways to interrogate and analyse data

In addition to time / date and geographic breakdown of your data you can interrogate it in ways that will tell your product story most effectively.

### 1.

By diagnosis or procedure

### 2.

By primary or secondary diagnosis

### 3.

By therapy areas – all long term and acute conditions (using ICD10 codes)

### 4.

By consultant speciality for out-patient data

## Deliver insight supported by significant real-world evidence at a national, regional or local level

1

Deliver a national view

211

Deliver a CCG focused view across the UK

135

Deliver a trust focused view

7,400+

Drill down to individual hospitals and GP practices

## 3 Delivery formats to suit your needs:

Quantis Dashboards

Quantis iPad App

Quantis Analytic Reports

Our experienced consultants will work with you to help deliver the outputs that best meet your specific objectives.
