

Customer data

Wilmington Healthcare provides fast, easy and flexible access to the largest, most granular and accurate UK healthcare data available.

This, along with first class consultancy and support, enables users to identify and precisely target their customers, leading to greater efficiencies and increased ROI whilst ensuring adherence to evolving compliance and data protection regulations.

Trusted by the NHS

1.23 million drug safety updates distributed to healthcare professionals each year and sole source used for distributing the BNF.

NHS customers include:

NICE | MHRA | Department of Health | NHS England

Flexible & accessible formats include:

- CRM feed
- Database
- Spreadsheet
- CSV
- Mailing labels
- Online dashboard
- Email campaign
- Research project
- Text file
- ...and many more

Our best-in-class customer service assures continuous support. [See what our customers say:](#)

“Wilmington Healthcare provides us with the insight & the data that enables us to really understand what is happening at a local level, to design our solutions and work with customers knowing their goals and priorities.”

“Wilmington Healthcare is proactive in providing information about changes in the data, reducing the ‘legwork’ for clients.”

“You understand our needs, understand what it is we’re trying to achieve and then help us design the solutions or provide the information in a way that will fit into what we’re trying to do.”
