

Database of Allied Health Professionals

Allied health professionals (AHPs) are key members of today's multidisciplinary healthcare team. They work in partnership with colleagues across primary, secondary care and social care as well as in the independent and voluntary sectors. They operate in a range of surroundings including hospitals, people's homes, clinics, surgeries and schools.

Database of Allied Health Professionals contains accurate contact details for AHPs working in the areas of dietetics, perfusion, physiotherapy and podiatry.

All information within the database is regularly primary source verified and updated by our specialist team of researchers; giving you the quality, targeted data you need and the reassurance that you will be GDPR compliant.

NOTES: It is common for contacts to have more than one responsibility. It follows therefore that there will be fewer named individuals on the database than there are areas of responsibility indicated above. Numbers of contacts will vary during the research cycle due to organisational changes. Counts were correct at time of publishing; **September 2020**.
