

A retail pharmacist works according to legal and ethical guidelines to ensure the correct and safe supply of medical products to the general public. They are involved in maintaining and improving people's health by providing advice and information, as well as supplying prescription medicines. Retail pharmacists also sell over-the-counter medical products and instruct clients in the use of medicines and medical appliances. Some pharmacists will also offer specialist health check services, such as blood pressure monitoring and diabetes screening.

Database of Retail Pharmacists provides a comprehensive list of retail pharmacists across the UK and Republic of Ireland; including those who have responsibility for purchasing at either local or national level.

All information within the database is regularly primary source verified and updated by our specialist team of researchers; giving you the quality, targeted data you need and the reassurance that you will be GDPR compliant.

The data can be segmented to enable targeting of campaigns by:

- Independent pharmacies
- Organisation services
- Retail chains
- Retail multiples
- Responsibility

Purchasers can be identified as:

- Purchasers at branch level
- Purchasers for whole chain

Database contents

There are 36,950 named individuals on the database.
