

# Database of Medicines Management

The National Prescribing Centre describes medicines management as 'a system of processes and behaviours that determines how medicines are used by the NHS and patients'.

Database of Medicines Management provides contact details for those people that are involved in defining and following those processes and behaviours to enable people to make the best possible use of medicines. As an important priority for the NHS, medicines management is practised by managers as well as clinical professionals throughout healthcare and references in key policy documents and national initiatives including the GMS contract, the Community Pharmacy Contractual Framework and many of the National Service Frameworks.

All information within the database is regularly primary source verified and updated by our specialist team of researchers; giving you the quality, targeted data you need and the reassurance that you will be GDPR compliant.

The data can be segmented to enable targeting of campaigns by:

- Commissioning area
- Job responsibility
- NHS region
- Organisation type

## Database contents

There are 31,659 named individuals on the database.

Responsibility/Role	Count
Area Manager	1,033
Area Prescribing Committee	12
Branch Purchaser	2,478
Chain Purchaser	342
Chair - Area Prescribing Committee	38
