

Database of Specialist Nurses

The term 'Specialist Nurse' encompasses a wide plethora of job titles, covering many different roles. Typically, a 'Specialist Nurse' spends the majority of their time (60%) in clinical activity with a further 17% spent in education, 14% in management activity and 4% in research. Core specialist nurse activities include patient assessment/referrals, autonomous decision making and offering specialist advice.

Database of Specialist Nurses provides accurate and up-to-date information for anyone seeking to influence senior staff in the nursing profession across the UK and Republic of Ireland.

All information within the database is regularly primary source verified and updated by our specialist team of researchers; giving you the quality, targeted data you need and the reassurance that you will be GDPR compliant.

The data can be segmented to enable targeting of campaigns by:

- Job responsibility
- Region
- Specialty or umbrella specialty

Database contents

There are 72,852 named individuals on the database.

Additional fields available:

- Area of expertise by therapy area
- Organisational Data Service Code (ODS)
- Sub Specialty by therapy area
