

# Database of Healthcare Interest Groups

Healthcare Interest Groups are defined as organisations whose members, staff and/or students share political, social or other goals and ambitions relating to healthcare and agree to try and influence public policy and opinion to achieve those goals. This can be achieved through education, legislation, financial support or Advisory roles.

Our database of Healthcare Interest Groups provides these organisations specifically where a clinical or healthcare related interest is present.

If you want to influence or find key opinion leaders in specific therapy areas and organisations like charities, Royal Colleges and Universities this product will help you, data covers UK and Republic of Ireland.

All information within the database is regularly verified and updated by our specialist team of product researchers; giving you the quality, targeted data you need and the reassurance that you will be GDPR compliant.

## Database contents

8,609

| Responsibility/Role                       | Count |

**Notes:** It is common for contacts to have more than one responsibility. It follows therefore that there will be fewer named individuals on the database than there are areas of responsibility indicated above. Numbers of contacts will vary during the research cycle due to organisational changes. Counts were correct at time of publishing; **July 2022**. De duped counts available upon request.
