

Database of Hospital Doctors

Hospital doctors work within many specialist and clinical therapy areas, and may also be involved in teaching and carrying out research. As well as day-to-day administrative duties such as keeping patient records and writing reports, Hospital doctors are increasingly undertaking managerial responsibilities in hospitals, getting involved in auditing and attending committee meetings.

Our Database of Hospital Doctors is ideal for anyone wishing to communicate and influence clinicians throughout the UK and Republic of Ireland, allowing tailored and precise targeting by treater type.

All information within the database is regularly verified and updated by our specialist team of product researchers; giving you the quality, targeted data you need and the reassurance that you will be GDPR compliant.

The data can be segmented to enable targeting of campaigns by:

- Grade
- Job responsibility
- Region
- Services provided by the organisation
- Specialty or overarching umbrella specialty

Database contents

80,063

Additional fields available:

- Organisational Data Service Code (ODS)
- Sub specialties/Treaters by therapy area
- Provider Collaborative Links

Responsibility/Role	Count
Clinical Directors	1,795
Director of Public Health	186
Medical Director	913
Other Hospital Doctors	76,299
Physician Associate	500
Public Health Consultant	319
Regional Advisor in Anaesthesia	13
Regional Advisor in Intensive Care Medicine	24
Regional Advisor in Pain Management	14

Notes: It is common for contacts to have more than one responsibility. It follows therefore that there will be fewer named individuals on the database than there are areas of responsibility indicated above. Numbers of contacts will vary during the research cycle due to organisational changes. Counts were correct at time of publishing; **July 2022**. De duped counts available upon request.
