

# Database of Allied Health Professionals

Allied health professionals (AHPs) are key members of today's multidisciplinary healthcare team. They work in partnership with colleagues across the healthcare system as well as in the independent and voluntary sectors. They operate in a range of surroundings including hospitals, people's homes, clinics and surgeries.

Our Database of Allied Health Professionals contains accurate contact details for AHPs working in the areas of dietetics, perfusion, physiotherapy, podiatry and radiology.

All information within the database is regularly verified and updated by our specialist team of product researchers; giving you the quality, targeted data you need and the reassurance that you will be GDPR compliant.

## Organisation types:

- GP Practice
- Health Board Scotland
- Health Care Interest Group
- ROI Hospital
- Independent Hospice
- Local Health Board
- Acute or Mental Health Services

**Notes:** It is common for contacts to have more than one responsibility. It follows therefore that there will be fewer named individuals on the database than there are areas of responsibility indicated above. Numbers of contacts will vary during the research cycle due to organisational changes. Counts were correct at time of publishing; **July 2022**. De duped counts available upon request.
