

# Database of NHS Pharmacists

Pharmacists make a difference to the lives of their patients through an expert knowledge of medicines and health. Helping people live longer and healthier lives depends on the safe use of medicines and excellent healthcare advice, pharmacists unique expertise makes them essential members of the healthcare team.

The hospital pharmacist is part of a hospital team, providing, preparing and dispensing medicines to patients who are or have been treated in the hospital.

Our Database of NHS Pharmacists provides a comprehensive source of information and insights within the UK.

All information within the database is regularly verified and updated by our specialist team of product researchers; giving you the quality, targeted data you need and the reassurance that you will be GDPR compliant.

The data can be segmented to enable targeting of campaigns by:

- Department
- Job responsibility
- Organisation type
- Specialty

**Notes:** It is common for contacts to have more than one responsibility. It follows therefore that there will be fewer named individuals on the database than there are areas of responsibility indicated above. Numbers of contacts will vary during the research cycle due to organisational changes. Counts were correct at time of publishing; **July 2022**. De duped counts available upon request.
