

Database of Healthcare Management in Republic of Ireland

Healthcare in the Republic of Ireland is based on a public health care model funded by general taxation. Provided by the Health Service Executive, the system is split into primary and secondary care components.

Working with administrators, providers, financial managers and marketing specialists, managers must be prepared to navigate competing demands and priorities within their organisation.

Our Database of Healthcare Management in Ireland contains key stakeholders and decision makers within selected management roles.

Notes: It is common for contacts to have more than one responsibility. It follows therefore that there will be fewer named individuals on the database than there are areas of responsibility indicated above. Numbers of contacts will vary during the research cycle due to organisational changes. Counts were correct at time of publishing; May 2023.
