

Database of NHS Pharmacists

Pharmacists make a difference to the lives of their patients through an expert knowledge of medicines and health. Pharmacists provide unique expertise and essential healthcare advice to ensure medicines are being used safely and efficiently. They're an integral part of our healthcare system.

Hospital Pharmacists are an essential part of a secondary care team. They provide, prepare and dispense medicines to treated patients.

Our Database of NHS Pharmacists provides a comprehensive source of information and insights within the UK.

All information within the database is regularly verified and updated by our specialist team of product researchers; giving you the quality, targeted data you need and the reassurance that you will be GDPR compliant.

The data can be segmented to enable targeting of campaigns by:

- Department
- Job responsibility
- Organisation type
- Specialty

Database contents

21,598

For the most up-to-date counts or to speak to us about our Campaign Packages, please call **01268 495600** or email sales@wilmingtonhealthcare.com

Notes: It is common for contacts to have more than one responsibility. It follows therefore that there will be fewer named individuals on the database than there are areas of responsibility indicated above. Numbers of contacts will vary during the research cycle due to organisational changes. Counts were correct at time of publishing; **May 2023**.
