

Database of Specialist Nurses

Specialist Nurses provide tailored care depending on the patients level of need. They also provide, education and support for patients to manage their symptoms, particularly patients with long term conditions and multiple morbidities. Typically, a 'Specialist Nurse' spend the majority of their time in clinical activity with the remaining spent in education, management activities and research.

Our Database of Specialist Nurses provides accurate insight for anyone seeking to influence senior staff in the nursing profession across the UK and Republic of Ireland. This product groups nurses with different responsibilities working across many clinical specialties.

All information within the database is regularly verified and updated by our specialist team of product researchers; giving you the quality, targeted data you need and the reassurance that you will be GDPR compliant.

The data can be segmented to enable targeting of campaigns by:

- Job responsibility
- Region
- Specialty or umbrella specialty
- Seniority

Database contents

82,473

Additional fields available:

- Organisational Data Service Code (ODS)

For the most up-to-date counts or to speak to us about our Campaign Packages, please call **01268 495600** or email sales@wilmingtonhealthcare.com

Notes: It is common for contacts to have more than one responsibility. It follows therefore that there will be fewer named individuals on the database than there are areas of responsibility indicated above. Numbers of contacts will vary during the research cycle due to organisational changes. Counts were correct at time of publishing; **May 2023**.
